

## Safety Data Sheet

In accordance with US 29 CFR 1910.1200 (HazCom 2012)

|                 |                         |
|-----------------|-------------------------|
| Product name    | <b>Sweater Weather</b>  |
| Product code    | <b>FRAG-00095</b>       |
| Version         | <b>1.0</b>              |
| Revision date   | <b>05 AUG 2026</b>      |
| Identified uses | <b>Perfume compound</b> |
| Intended use    | <b>Fragrances</b>       |

### Section 1 — Product And Company Identification

#### Supplier

Scented Supplies  
41W195 Railroad St  
Unit D  
Pingree Grove, IL 60140  
United States of America  
224-530-3021 · www.scentedsupplies.com

#### Emergency telephone

224-530-3021

### Section 2 — Hazards Identification

#### Classification (OSHA HCS)

| Hazard class          | Category   |
|-----------------------|------------|
| Skin irritation       | Category 2 |
| Skin sensitisation    | Category 1 |
| Reproductive toxicity | Category 2 |

**Signal word:** Warning

#### Hazard statements

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H361 Suspected of damaging fertility or the unborn child.

## Precautionary statements

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P261 Avoid breathing mist or vapours.

P264 Wash skin thoroughly after handling.

P272 Contaminated work clothing must not be allowed out of the workplace.

P280 Wear protective gloves.

P280 Wear protective gloves, protective clothing, eye protection and face protection.

P302 + P352 IF ON SKIN: Wash with plenty of water.

P308 + P313 IF exposed or concerned: Get medical advice/ attention.

P333 + P313 If skin irritation or rash occurs: Get medical advice/ attention.

P362 + P364 Take off contaminated clothing and wash it before reuse.

P405 Store locked up.

P501 Dispose of contents/ container to an approved waste disposal plant.

Hazards Not Otherwise Classified: None

Please note: Mixtures have not been tested for health hazards. The health hazard information presented is provided in accordance with US 29 CFR 1910.1200 and is based on the testing of individual components which have been shown to cause or may cause these health effects when tested at higher concentrations or at full strength.

Ingredients with unknown acute toxicity: 0 %

## Section 3 — Composition/information On Ingredients

### Hazardous components

| Component                                                                                                                                                          | CAS-No.    | Concentration [%] |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|-------------------|
| 2-acetyl-1,2,3,4,5,6,7,8-octahydro-2,3,8,8-tetra- methylnaphtalene (main isomer)                                                                                   | 54464-57-2 | 7.00 - 13.00      |
| Benzoic acid, phenyl methyl ester                                                                                                                                  | 120-51-4   | 7.00 - 13.00      |
| 4,7-mehtano-1H-indene-2-carboxaldehyde, octahydro-5-methoxy- 2-Ethyl-4-(2,2,3-trimethyl-3-cyclopenten -1-yl)-2- 28219-61-6 0.50 - 1.50 buten-1-ol (main component) | 86803-90-9 | 1.00 - 5.00       |
| methyl 2,4-dihydroxy-3,6-dimethylbenzoate                                                                                                                          | 4707-47-5  | 0.50 - 1.50       |
| 3,7-dimethylnona-1,6-dien-3-ol (cis & trans)                                                                                                                       | 10339-55-6 | 0.50 - 1.50       |
| 7-hydroxy-3,7-dimethyloctan-1-al                                                                                                                                   | 107-75-5   | 0.50 - 1.50       |
| (ethoxymethoxy)cyclododecane                                                                                                                                       | 58567-11-6 | 0.50 - 1.50       |
| 3-(3,4-Methylene dioxyphenyl)-2- methylpropanal 3,7-dimethyl-2,6-octadienyl acetate (= geranyl 105-87-3 0.10 - 1.00 acetate)                                       | 1205-17-0  | 0.10 - 1.00       |
| 2H-1-benzopyran-2-one (=coumarin)                                                                                                                                  | 91-64-5    | 0.10 - 1.00       |

| cis-4-(isopropyl)cyclohexanemethanol                                                                                                                               | 13828-37-0 | 0.10 - 1.00       |
| 6,7-Dihydro-1,1,2,3,3-pentamethyl-4(5H)- indanone                                                                                                                  | 33704-61-9 | 0.10 - 1.00       |
| 2-methyl-3-(4-isopropylphenyl)propanal                                                                                                                             | 103-95-7   | 0.10 - 1.00       |
| 2,4-dimethylcyclohex-3-ene-1-carbaldehyde                                                                                                                          | 68039-49-6 | 0.10 - 1.00       |

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

## Section 4 — First Aid Measures

### First aid measures

#### Description of first aid measures

|                                             |                                                                                                                                                                                                                                                                                          |
|---------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General advice</b>                       | Move out of dangerous area. Show this safety data sheet to the doctor in attendance. Consult physician or Poison Control Center. The National Hotline for US Poison Control Centers is 1.800.222.1222; <a href="https://www.poison.org">https://www.poison.org</a>                       |
| <b>If inhaled</b>                           | If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.                                                                                                                                                                               |
| <b>In case of skin contact</b>              | Immediately seek medical attention if chemical entered ear canal. If skin irritation persists, call a physician. If on skin, rinse well with water. If on clothes, remove clothes.                                                                                                       |
| <b>In case of eye contact</b>               | Protect unharmed eye. Remove contact lenses. Flush eyes with water as a precaution. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.                                                                                                                  |
| <b>If swallowed Most important symptoms</b> | Immediately consult Poison Control Center or physician. Keep respiratory tract clear. Do NOT induce vomiting. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician. and effects, both acute and delayed |

Causes skin irritation. May cause an allergic skin reaction. Suspected of damaging fertility or the unborn child.

### Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

## Section 5 — Firefighting Measures

### Extinguishing media

|                                                                         |                                                                                                                                                                                                  |
|-------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>                                     | Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.                                                                                                                         |
| <b>Unsuitable extinguishing media</b><br><b>Special hazards arising</b> | High volume water jet from the substance or mixture                                                                                                                                              |
| <b>Specific hazards during firefighting</b>                             | Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains or water courses. |

### Advice for firefighters

|                                                      |                                                                                                                                                                                                                                                                                  |
|------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Special protective equipment for firefighters</b> | Wear self-contained breathing apparatus for firefighting if necessary.                                                                                                                                                                                                           |
| <b>Further information</b>                           | In the event of fire and/or explosion do not breathe fumes. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. |

## Section 6 — Accidental Release Measures

### Personal precautions, protective equipment and emergency procedures

Keep people away from and upwind of spill/leak. For emergency conditions, use an approved positive-pressure self-contained breathing apparatus. Material can create slippery conditions. Use personal protective equipment.

## Environmental precautions

Prevent product from entering drains. If the product contaminates rivers and lakes or drains inform respective authorities.

## Methods and materials for containment and cleaning up

Clean contaminated floors and objects thoroughly while observing environmental regulations. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Keep in suitable, closed containers for disposal.

## Section 7 — Handling And Storage

### Precautions for safe handling

|                                                                                     |                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Advice on safe handling</b>                                                      | Do not breathe vapours/dust. Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Dispose of rinse water in accordance with local and national regulations. |
| <b>Advice on protection against fire and explosion Conditions for safe storage,</b> | Normal measures for preventive fire protection. including any incompatibilities                                                                                                                                                                                                                                     |
| <b>Requirements for storage areas and containers</b>                                | Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.                          |
| <b>Further information on storage conditions</b>                                    | Ambient / 10-30°C (50-85°F) Dry, well ventilated, preferably full, hermetically sealed                                                                                                                                                                                                                              |
| <b>Advice on common storage</b>                                                     | Protect against light.                                                                                                                                                                                                                                                                                              |
| <b>Other data</b>                                                                   | No decomposition if stored and applied as directed.                                                                                                                                                                                                                                                                 |

## Section 8 — Exposure Controls/personal Protection

### Exposure Guidelines

|                          |                  |
|--------------------------|------------------|
| <b>Exposure limit(s)</b> | None established |
|--------------------------|------------------|

### Exposure controls

Exposure assessment: Exposures are dependent on the product being handled, the potential for chemical release, and any resulting airborne concentrations or dermal contact. Since product handling and release scenarios vary, and no two workplaces are exactly alike, it is recommended that the potential for exposure be assessed prior to the product's use or introduction. Exposure assessments should be performed by an occupational hygienist, industrial hygienist, or other qualified occupational or environmental health professional. An exposure assessment should be conducted to determine the efficacy of any ventilation and the need for additional PPE. The PPE indicated below are recommendations for worst-case scenario exposures. An exposure assessment will identify more applicable measures to be implemented. EN and ANSI standards are mentioned in the following recommendations, consult equivalent local standards when required. PPE is always the last resort to avoid exposure. In any case technical and organisational measures have to be explored and used prior to the selection of PPE. The PPE selection is for operators trained to work with chemicals according to good industrial hygiene and safety practice. Operators have to be trained on the use of PPE.

### Engineering measures

Use engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, use the product only with adequate ventilation.

## Personal protective equipment

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye/face protection</b>                     | Use safety goggles tested according to EN 166/ ANSI Z87.1 or equivalent local standard.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Hand protection</b>                         | Use gloves when handling substance in open systems. Inspect gloves prior to use. Train operators for proper use. If only incidental exposure is expected: (work without direct contact to substance) use gloves tested according EN 16523- 1/ASTM F739 or equivalent local standard breakthrough times at least 10 minutes, tested for chemicals indicated in chapter 3 of this SDS. Change gloves frequently. If direct skin contact is expected: use gloves tested according to EN 16523-1/ASTM F739 or equivalent local standard, tested for chemicals indicated in chapter 3 of this SDS. Permeation time must exceed contact time.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Other skin protection</b>                   | Wear working clothes covering arms and legs. The type of protective equipment must be selected according to the concentration and amount of the hazardous substance at the specific workplace. Use apron and sleeve covers or complete chemical suit if exposure is expected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Respiratory protection</b>                  | Respiratory protection should be worn when workplace exposures exceed exposure limit requirements or guidelines. If there are no applicable exposure limits or guidelines, use an approved respirator where there is a potential for adverse effects, including but not limited to respiratory irritation or odor, or where indicated by the exposure assessment. Selection of air-purifying or positive-pressure supplied-air will depend on the results of the exposure assessment which includes an evaluation of the specific operations and the potential airborne concentrations. For emergency conditions, use an approved positive-pressure self-contained breathing apparatus. In case a risk analysis proved the cartridge respirator as acceptable, use type: ABEK-P3 (EN 14387) OR Combination Multi-gas/P100 (42CFR84.193; ANSI Z88.7 or equivalent local standard) as a backup to engineering controls. In absence of engineering controls, use self-contained breathing apparatus or full face supplied air respirators. Use respirators and components tested and approved under appropriate government standards such as CEN (EU) or NIOSH 42 CFR 84(US). |
| <b>Thermal hazards</b>                         | Wear appropriate thermal protective clothing, when necessary.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Hygiene measures Environmental exposure</b> | Remove contaminated clothing and protective equipment before entering eating areas. Do not eat, drink or smoke during work. Wash hands any time after handling the product. controls                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>General advice</b>                          | Prevent product from entering drains. If the product contaminates rivers and lakes or drains inform respective authorities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## Section 9 — Physical And Chemical Properties

|                              |                                         |
|------------------------------|-----------------------------------------|
| <b>Physical state</b>        | liquid                                  |
| <b>Form</b>                  | liquid                                  |
| <b>Color</b>                 | Almost colorless to Pale yellow         |
| <b>Taste</b>                 | not determined                          |
| <b>Odor</b>                  | fruity, woody, Citrus-like              |
| <b>Odour Threshold</b>       | Not applicable                          |
| <b>Flash point</b>           | > 230 °F (> 110 °C) Method: Erafash S10 |
| <b>Lower explosion limit</b> | not determined                          |

|                                                     |                                                 |
|-----------------------------------------------------|-------------------------------------------------|
| <b>Upper explosion limit</b>                        | not determined                                  |
| <b>Flammability</b>                                 | Not applicable                                  |
| <b>Particle size</b>                                | no data available                               |
| <b>Particle Size Distribution</b>                   | no data available                               |
| <b>Auto-ignition temperature</b>                    | not determined                                  |
| <b>Decomposition temperature</b>                    | no data available                               |
| <b>pH</b>                                           | not determined                                  |
| <b>Melting point</b>                                | no data available                               |
| <b>Boiling point</b>                                | no data available                               |
| <b>Vapor pressure</b>                               | 0.1452 hPa at 68 °F (20 °C) Calculated (99.8 %) |
| <b>Density</b>                                      | 988.21 kg/m3 at 68 °F (20 °C)                   |
| <b>Bulk density</b>                                 | Not applicable                                  |
| <b>Solubility/qualitative</b>                       | practically insoluble                           |
| <b>Partition coefficient: n- octanol/<br/>water</b> | Not applicable                                  |
| <b>Viscosity, kinematic</b>                         | no data available                               |
| <b>Relative vapour density</b>                      | no data available                               |
| <b>Evaporation rate</b>                             | no data available                               |

## Section 10 — Stability And Reactivity

### Reactivity

No decomposition if stored and applied as directed.

### Chemical stability

No decomposition if stored and applied as directed.

### Possibility of hazardous reactions

|                            |                                                     |
|----------------------------|-----------------------------------------------------|
| <b>Hazardous reactions</b> | No decomposition if stored and applied as directed. |
|----------------------------|-----------------------------------------------------|

### Conditions to avoid

|                            |                   |
|----------------------------|-------------------|
| <b>Conditions to avoid</b> | no data available |
|----------------------------|-------------------|

### Incompatible materials

|                                                   |                         |
|---------------------------------------------------|-------------------------|
| <b>Materials to avoid Hazardous decomposition</b> | Not applicable products |
| <b>Hazardous decomposition products</b>           | no data available       |
| <b>Thermal decomposition</b>                      | no data available       |

## Section 11 — Toxicological Information

### Information on toxicological effects

#### Acute oral toxicity

|                                                                                        |                                                                            |
|----------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| <b>ATE</b>                                                                             | > 5,000 mg/kg                                                              |
| <b>2-acetyl-1,2,3,4,5,6,7,8-octahydro-2,3,8,8-tetramethylnaphthalene (main isomer)</b> | LD50: > 5,000 mg/kg Species: Rat                                           |
| <b>Benzoic acid, phenyl methyl ester</b>                                               | LD50: 2,000 mg/kg Species: Rat                                             |
| <b>4,7-mehtano-1H-indene-2-carboxaldehyde, octahydro- 5-methoxy-</b>                   | LD50: 2,800 mg/kg Species: Rat                                             |
| <b>methyl 2,4-dihydroxy-3,6-dimethylbenzoate</b>                                       | LD50: > 8,000 mg/kg Species: Rat                                           |
| <b>7-hydroxy-3,7-dimethyloctan- 1-al</b>                                               | LD50: > 5,000 mg/kg Species: Rat                                           |
| <b>(ethoxymethoxy)cyclododeca ne</b>                                                   | LD50: > 5,000 mg/kg Species: Rat                                           |
| <b>3-(3,4-Methylene dioxyphenyl)-2-methylpropanal</b>                                  | LD50: 3,561 mg/kg Species: Rat                                             |
| <b>3,7-dimethyl-2,6-octadienyl acetate (= geranyl acetate)</b>                         | LD50: 6,330 mg/kg Species: Rat                                             |
| <b>2H-1-benzopyran-2-one (=coumarin)</b>                                               | Acute toxicity estimate: 500 mg/kg Species: Rat                            |
| <b>3,7-dimethyl-6-octen-1-ol (= citronellol)</b>                                       | LD50: 3,450 mg/kg Species: Rat                                             |
| <b>cis-4-(isopropyl)cyclohexanemetha nol</b>                                           | LD50: > 10,000 mg/kg Species: Rat                                          |
| <b>6,7-Dihydro-1,1,2,3,3-pentamethyl-4(5H)-indanone</b>                                | LD50: 2,900 mg/kg Species: Rat                                             |
| <b>Acute inhalation toxicity</b>                                                       | No data is available on the product itself.                                |
| <b>Acute dermal toxicity</b>                                                           | No data is available on the product itself.                                |
| <b>Acute toxicity (other routes of administration)</b>                                 | No data is available on the product itself.                                |
| <b>Skin corrosion/irritation</b>                                                       | May cause skin irritation and/or dermatitis.                               |
| <b>Serious eye damage/eye irritation</b>                                               | Vapours may cause irritation to the eyes, respiratory system and the skin. |
| <b>Respiratory or skin sensitisation</b>                                               | Causes sensitisation.                                                      |
| <b>Mutagenicity</b>                                                                    | No data is available on the product itself.                                |
| <b>Teratogenicity</b>                                                                  | No data is available on the product itself.                                |

#### Reproductive toxicity

Suspected of damaging fertility or the unborn child.

## Carcinogenicity:

|                                                                                                                                                       |                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>IARC</b>                                                                                                                                           | Remarks : No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.                                                                |
| <b>OSHA</b>                                                                                                                                           | Remarks : No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.                                                                                               |
| <b>NTP</b>                                                                                                                                            | Remarks : No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.                                                                                |
